Document Purpose

This is the proposal document to consume MasterGST APIs as part of the MasterGST GSP solution. The document lists the solution proposal, the scope of work and pricing.

Solution Overview

As part of the GST Implementation, the client seeks to consume the APIs for implementing the GST integration with their ERP/Accounting SW as an ASP.

Cyclone pharmaceuticals Pvt Ltd be integrating their ERP/Accounting SW as an ASP to connect to MasterGST APIs and consume the APIs for GST transaction processing and filing.

Scope of proposal

The Scope of proposal on a High-Level includes:

- Cyclone pharmaceuticals Pvt Ltd Pvt Ltd MasterGST APIs for e-Invoicing solution.
- Each API consumed will be shown as metrics
- Annual Maintenance including changes due to APIs released from GSTN and enhancements/bug fixes in the MasterGST GSP product
- Any additional support requirement will be included on case by case basis as an additional scope.

MasterGST GSP functionality

- Authentication
- Returns
- Payments
- Ledger

*GSTN Network will keep on updating the APIs as part of the continuous improvement of their system and upon upgrade GSTN APIs MasterGST GSP Solution will also upgrade in line with GSTN APIs.

Requirements from Client:

We would require the following from Client.

- Develop, Integrate and test the connectivity to MasterGST APIs with their ASP solution/ERP/POS
- User Testing of the Invoice data field mapping to MasterGST APIs.
- Since this system should be high availability we already have load balancer to avoid the down time as part of the cloud solution. This may be further validated by the client's network and IT team.

Pricing

1. MasterGST GSP Solution on an annual contract basis and payable on in advance on Invoice Raised.
