## ABOUT ME

Aspiring Front End Developer developer with 1+ years of experience working in frontend development. Skilled in building web applications using Angular

## PROFESSIONAL PROJECTS

**GST RECONCILIATION    [08/2022 - Present]**

PROJECT TASK

- Reconciliation helps the taxpayers know if the taxes are short/excess paid or not paid at all. We created reconciliation between the provisional ITC and the actual ITC claimable under GSTR-2B .
- Contributed in the Frontend development of project. Created pages using Angular , Angular Material and Bootstrap as UI framework. Integrated JAVA REST Apis for system requirements. Used postman as dependency breaker from backend for testing Apis.
- Designed all the major and multiple reusable components of website such as users, admin, profile, operations, transaction and clients with the help of Angular, HTML, CSS, Bootstrap and Angular Material.

**KYS   [02/2022 - 08/2022]**

PROJECT TASK

- In this website we provide the facility to manage the administrators of the sangh by adding, deleting or editing new admins and also provide all the necessary details about them.
- We created a Dashboard which provide all the information in a feasible manner through pie charts which tells about total subscribers and plans of sangh.
- I design all the major and multiple reusable components of website such as subscribers, manage admin, books, plans, camp management, manage address with the help of Angular, HTML, CSS, Bootstrap
- Key Responsibilities :
1. Used HTML and CSS to design and style web pages.
2 .Designed and structured layout using Bootstrap and Grid.
3.Used Typescript as major programming language to set layout foundation for webpages.
4. Used Angular framework to maintain functionality of the webpages.
