Inventory Management, Material Management & Distribution Management Software for Pharmaceutical Management.

PaperLess GMP

**First time in world
PaperLess GMP Digital
platform for Pharma QMS / Documentation**

INTRODUCTION TO PaperLess GMP

A paperless GMP manufacturing operation sounds counter-intuitive. Almost all operations use paper forms especially pharmaceutical manufacturing.

With growing future and established documentation system CPPL decided to go one step ahead. Till now many companies have developed ERP systems for Pharmaceutical Industries but these ERP systems are identical with it's name its Pharmaceutical Entrepreneurs resources system means management information system.

CPPL Decided to change the concept and developed a GMP Software which will really take care of your all systems. It's validated GMP Software and have inbuilt quality systems.

It's Not EPR It's PaperLess GMP

You are now free from paper and you have to just implement a advanced digital pharma ERP concept we called it as Paperless GMP.

The Advanced ERP which we are providing is Paperless GMP system where from Procurement to Dispatch you will get accountability for everything along with compliance to the Current Good Manufacturing Practices.

The Paperless GMP System is Compliant to all guidelines of the world.
A unique and Novel research by Minds of Pharma and Software Technocrats.
